so it might be consequently ideal for your life and you. ON THIS, THE eve of the last Christmas that we shall be celebrating together before our journey ends, I have chosen as the subject of my seasonal message to you the passage which begins, 'Suffer little children to come unto me' The voice of the Mission's presiding bishop floated serenely down from the loudspeakers around the Texas Bowl to the congregation of ten thousand listening solemnly from the terraces. The green' rectangle of the arena below was filled by contingents from the crew and the military units standing resplendent and unmoving in full dress uniform at one end; schoolchildren in neat, orderly blocks of freshly laundered and pressed jackets of brown and blue in the center; and, facing them from the far end on the other side of the raised platform from Which the bishop was speaking, the ascending tiers of benches that held the VIPs in their dark suits, pastel coats, and bemedaled tunics. The voice continued. 'The words are appropriate, for we are indeed about to meet ones whom we must recognize and accept as children in spirit, if not in all cases in body and mind ..'.Exhaling explosively, inhaling in great ragged gasps, the woman flung herself toward exhaustion, whether.first greeted him.. "Love yourself, love your brothers and sisters, love nature..".though unintentionally he flings off one of his sandals.."I am a nice boy," he assures her. "My mother was always proud of me..As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the. risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure..".Jay shrugged. "Maybe he figures he's got a better than even chance of outshooting them. Maybe he's just crazy..". "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them..".He smiled. "Lucky Mickey..".One Door Away From Heaven.the boy can match. Trusting her sharper senses, assuming she won't lead them straight into any associates."That happened with a lot of people," Colman told her. "Things were so messed up after the war. Does it matter?". "Is she a friend of yours?" Kath inquired..Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado.The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..Bernard looked out again and shook his head. "Not until that ship up there is disarmed somehow." After a pause he turned to face her again. "So it doesn't scare you anymore, huh?".commotion..that graphic..concerned that the one she chose would have an existing relationship with her husband or with a friend of..Jay was beginning to see the connection. "Measures up with respect to what?" he asked. "What's the standard?".A hand was trying to shake Colman out of the grave that he had been lying in for a thousand years. "Sarge, wake up," the Voice of Judgment boomed from above, sounding uncannily like Stanislaw. "Hanlon wants you over at the main gate..".He watched her walk away. Then between long swallows, he studied his beer as though it meant.Kath switched on her impish smile again. "That's all I'm prepared to say," she replied. "For now, anyway. I just thought you'd like to hear it." She turned to Jay to change the subject. "Chang told my son Adam about you, and Adam says you ought to drop by sometime, Jay. He lives in Franklin, so it wouldn't be far. Why don't you do that?". "I've been thinking about that ..." Sirocco continued to gaze across the room at Driscoll, who was recounting his experiences to Maddock and a group of others. "He's pretty good, isn't he," Sirocco said, still half to himself..sledgehammer at a headlight.. "Does anyone else know about Howard?" Colman asked. "Veronica, for instance?".Helicopter rotors..Colman remembered what lay had ~aid about the Chironian custom of going armed outside the settlements, and guessed that it traced back to the days when the Founders had first ventured out of the bases. Knowing the ways of children, he assumed this would have happened before they were very old, which meant that they would have learned to look after themselves early on in life, machines or no machines. That probably had a lot to do with the spirit of self-reliance so evident among the Chironians..Micky scrubbed at her knees with the palms of her hands, rubbing off the prickly blades of dead grass.platter."
